

MEENA E

meenarekhadvelmrm@gmail.com | +91 8124336727 | Tiruvannamalai, Tamil Nadu | [portfolio](#) | github.com/meena | linkedin.com/in/meena-e

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate at Anna University with a strong interest in machine learning, deep learning, and software development. Skilled in Python, data analysis, and AI technologies, with hands-on experience developing AI and software projects. Eager to apply technical skills, learn new technologies, and contribute to real-world software and AI solutions.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

Madras Institute of Technology, Anna University, Chennai

CGPA: 8.46 / 10

2023 – 2027 (Expected)

HSC – 96.8%

Centre of Academic Excellence, Saidapet, Chennai

April 2023

SKILLS

Programming	Python, C, C++, SQL
ML & AI	Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), CNN, LSTM
Libraries	TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV, Pandas, NumPy
Web Technologies	HTML, CSS, JavaScript, React.js, Node.js, Flask
Databases	MySQL, MongoDB
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

PROJECTS

Text Dataset Analysis Dashboard

| *React.js* | *JavaScript* | *NLP* | *Data Visualization*

- Developed an interactive dashboard to analyze large text datasets using React.js.
- Implemented visualizations including word frequency charts, word clouds, n-gram analysis, and sentiment distribution.
- Built a CSV dataset upload interface for dynamic text analysis and visualization.

Crop Price Prediction System – AgriPrice Pro

| *Python* | *Machine Learning* | *Flask*

- Developed a machine learning model using Decision Tree Regressor to forecast crop prices using rainfall and WPI datasets.
- Built a Flask-based dashboard displaying crop price trends and 6–12 month predictions.
- Applied data preprocessing and exploratory data analysis to identify seasonal agricultural patterns.

Image Captioning using Deep Learning

| *Python* | *TensorFlow* | *Keras* | *CNN* | *LSTM* | *Computer Vision* | *NLP*

- Developed a deep learning model to automatically generate captions for input images.
- Used ResNet-50, LSTM, and an attention mechanism to extract image features and generate captions.
- Trained the model on the Flickr8k dataset and built a Streamlit-based web application for real-time caption generation.

Paddy Disease Detection using CNN

| *TensorFlow* | *Keras* | *OpenCV* | *Computer Vision*

- Developed a CNN-based image classification model to detect paddy leaf diseases.
- Processed agricultural image datasets with noise handling and class imbalance techniques.
- Visualized convolutional feature maps to analyze model predictions and classification behaviour.

Online Exam Management System

| *Python* | *PHP* | *Oracle Database*

- Developed a web-based examination management system for student registration, exam scheduling, and evaluation.
- Automated result generation and exam workflow management, reducing manual errors and improving processing efficiency.

CERTIFICATIONS

- Big Data Computing – NPTEL (79%)
- GenAI-Powered Data Analytics – Tata Forage
- Generative AI – GUVI
- SQL Developer – Infosys

LANGUAGES

Tamil · English · Japanese (N5)
